

```
import java.util.*;
class stringTokenizer
{
    public static void main(String args[])
    {
        Scanner s = new Scanner(System.in);
        int sum = 0;
        System.out.println("Enter the integers seperated by space");
        String str = s.nextLine();
        StringTokenizer data = new StringTokenizer(str, " ");
        while(data.hasMoreTokens())
        {
            String data1 = data.nextToken();
            int n = Integer.parseInt(data1);
            System.out.println(n);
            sum = sum + n;
        }
        System.out.println("The sum is " + sum);
    }
}
```

Output :-

Enter the integers seperated by space

1 2 3 4 5

1

2

3

4

5

The sum is 15
